

School and College (Key Stage 5)

Performance Tables
2010

South East C
FE38

Introduction

These tables provide information on the achievement and attainment of students of sixth-form age in local secondary schools and further education sector colleges. They also show how these results compare with other schools and colleges in the area and in England as a whole.

The tables list, in alphabetical order and subdivided by the local authority (LA), the further education sector colleges, state funded secondary schools and independent schools in the regional area with students of sixth-form age. Special schools that have chosen to be included are also listed, and a final section lists any sixth-form centres or consortia that operate in the area.

The Performance Tables website **www.education.gov.uk/performancetables** enables you to sort schools and colleges in rank order under each performance indicator; to search for types of schools and download underlying data.

Each entry gives information about the attainment of students at the end of study in general and applied A and AS level examinations and equivalent level 3 qualification (otherwise referred to as the end of 'Key Stage 5').

The information in these tables only provides part of the picture of the work done in schools and colleges. For example, colleges often provide for a wider range of student needs and include adults as well as young people among their students. The tables should be considered alongside other important sources of information such as Ofsted reports and school and college prospectuses.

Ofsted school inspection reports can be found on Ofsted's website at **www.ofsted.gov.uk** or direct from the school. State funded schools must provide parents with prospectuses on request.

South East C FE38

Local Authorities covered:

Surrey

West Sussex

Local authorities, through their Connexions services, Connexions Direct and Directgov Young People websites will also be an important source of information and advice for young people considering their post-16 options.

For more information on Connexions Direct visit **www.connexions-direct.com** and for Directgov Young People visit **<http://www.direct.gov.uk/en/YoungPeople/index.htm>**

How to Read these Tables

School or college particulars

The tables give the following details for each school and college:

- the name, address and telephone number;
- what type of school or college it is;
- whether the school is a designated specialist school (e.g. Arts, Language, Sports, Technology, Science college etc);
- the admissions policy for schools (selective, comprehensive, modern, non-selective);
- whether the school or college is mainly for girls, boys or both;
- the main age range of the school or college; and
- the total number of students aged 16, 17 and 18 at the start of the 2009/10 academic year that were registered at the school or college in January 2010, regardless of what they studied.

The 2010 results

The general and applied A level, AS examination and equivalent qualification results were provided by the awarding organisations concerned and made available to schools and colleges for checking in September 2010. Some reviews of the grades awarded to students requested of awarding organisations by schools and colleges were not completed in time to affect the information included in these tables. It is, therefore, possible that, for some schools and colleges, the published information would have been different had the results of the reviews been available earlier. If you have an interest in a particular institution's results, you should check with the school or college.

If a school or college did not confirm that it had checked its results, the initial 'R' appears after its age range.

SCHOOLS AND COLLEGES

Key Stage 4 to Key Stage 5 Value Added

Local Authority area:	Number of students aged 16-18	VA score	95% Confidence Interval		Coverage Indicator	
			Upper Limit	Lower Limit		
Local Authority area average (excluding independent schools)						
Name of College	VA (T,AL,LEPP)	11-18	226	996.2	1012.1	97%
Address						
Address Postcode Tel XXXX XXXXX	COMP	MIXED			980.2	

Abbreviations and symbols that appear in this section are explained in the "Abbreviations and their meanings" section at the back of the booklet.

The number of 16-18 year old students (age at start of academic year, i.e. 31st August 2009) on roll at the institution.

VA measure based on individual pupil progress between KS4 and KSS. The measure is represented as a number based around 1000 and indicates the value the institution has added on average for their students.

VA scores are a way of estimating the underlying effectiveness of an institution. As we cannot calculate this score exactly we provide a confidence interval. The confidence interval gives a range for where the VA score is most likely to fall. The figures here show the upper and lower limits of this range.

The percentage of students eligible for A/AS or equivalent study who were included in the value added calculation. A VA measure is not published for institutions with less than 50% coverage.

General and Applied A/AS or Equivalent Achievement

Number at end of A/AS or equivalent study in 2009/10	Average point score per student for 2010	Average point score per examination entry for 2010
	782.0	208.6
97	917.1	217.5

The number of 16-18 year old students (age at start of academic year, i.e. 31st August 2009) at the end of A/AS or equivalent study and on roll in January 2010.

The average point score per entry in 2010. The average point score per entry is calculated by dividing the total number of points achieved by students at the end of A/AS or equivalent study by the total number of entries.

The average point score per student in 2010. The average point score per student is calculated by dividing the total number of points achieved by students at the end of A/AS or equivalent study by the number of students on roll at the end of A/AS or equivalent study.

Year on Year Comparison

Average point score per student				Average point score per examination entry			
2007	2008	2009	2010	2007	2008	2009	2010
769.2	766.5	777.7	782.0	206.7	208.9	208.0	208.6
750.7	702.0	695.6	917.1	208.4	202.6	209.4	217.5

These four columns show the average point score per student and how the results have changed since 2007.

These four columns show the average point score per entry and how the results have changed since 2007.

Key Stage 4 to Key Stage 5 value added measure

A Key Stage 4 to 5 Value Added (VA) measure has been published for all schools and colleges.

It is important these complementary measures are not focussed on in isolation, as to do so could give rise to misleading interpretation of an institution's performance.

What is value added?

The level 3 examination results attained by students provide important information about the performance of an institution.

We know, however, that every student is different and each will have their own learning needs: some will have to do a lot of catching up to achieve A level or equivalent level 3 qualifications, for others it may be relatively easily attained.

We therefore also measure the progress made by a student from the end of Key Stage 4 to the end of Key Stage 5.

When comparing the performance of institutions it is important to recognise the progress they have helped students make.

Simple value added (VA) measures allow comparisons to be made between institutions with different intakes by taking into account each student's starting point or Key Stage 4 prior attainment, usually attained whilst in Year 11 – the biggest single predictor of their results at Key Stage 5.

The Key Stage 4 to Key Stage 5 VA is not very different from simple VA. The basic principle of measuring progress from the end of Key Stage 4 to qualifications attained at Key Stage 5 remains the same. However, the VA measure published in these tables take account of a number of other explanatory factors which have been observed to impact on its students' results, even after allowing for their prior attainment, such as gender, the type of qualification and size of the learning programme they have studied.

VA therefore goes a step further than simple VA by taking these factors into account to measure the effectiveness of an institution.

Calculation of the value added (VA) scores

We base each student's VA score on a comparison between their total Key Stage 5 point score - and the typical performance of students with similar characteristics and similar results at Key Stage 4.

If the student's total Key Stage 5 results are better than the average achieved by their peers, the VA will be positive; if they do less well, it will be negative.

All individual student scores, positive and negative, are added together and an average produced for the institution.

The VA score is then presented as a number based around 1000. This indicates the value the school or college has added on average for its students, given what is known about the circumstances of its student intake.

A more detailed explanation of the statistical model and the calculations used to produce the VA score can be found in the 'Key Stage 4 to 5 Guide to VA' document on the website:

www.education.gov.uk/performanceables

What is published for VA

The VA section of this publication shows, for each school:

- the Key Stage 4 to 5 VA score
- the upper and lower limits of a 95% confidence interval
- a coverage indicator

The coverage indicator shows the percentage of students at the end of Key Stage 5 included in the VA calculation. This might not be 100% because we do not have prior attainment for some students (e.g. the Key Stage 4 examination results) - for example, because they were previously educated outside England.

If the coverage is very low (below 50 percent) then the VA score is not published because it does not properly represent the effectiveness of the school or college.

What a school or college's VA score tells you

An institutional VA score of 1030 means that on average each of a school or college's students achieved the equivalent of one A level grade higher in one subject than the average attained by similar students.

Conversely, a score of 970 means that the school or college students achieved one grade lower than the average attained by similar students.

The VA score gives an indication of school and colleges' overall effectiveness. However, the significance that can be attached to any particular institution's VA measure depends, among other things, on the number of students included in the VA calculation.

The smaller the number of students, the less confidence can be placed on the VA measure as an indicator of whether the effectiveness of a school or college is significantly above or below average.

Confidence Intervals

The VA measure is a statistical means of assessing the relative effectiveness of a school or college or student progress between Key Stage 4 and Key Stage 5.

VA is, however, based on a given set of students' results in particular qualifications at a particular time.

A school or college could have been equally effective even if the same students had achieved different results. And it would almost certainly have shown a slightly different outcome with a different set of students, even where they had the same levels of prior attainment.

Hence, although the VA is based on all students at the end of Key Stage 5, not just a sample of them, this degree of uncertainty should be taken into account when interpreting the VA measure as an estimate of a school or college's effectiveness.

The uncertainty of a VA score as a measure of a school or college's effectiveness can be presented as a confidence interval (CI). This is a range of scores within which we can be statistically confident that the "true" school or college effectiveness will lie.

The degree of significance that can be attached to a school or college's VA measure depends, among other things, on the number of students included in the calculation.

The VA methodology produces a 95 percent CI to show the range within which we can be confident the VA score represents the overall effectiveness of a school or college.

If a school or college's cohort is large, the width of the CI will be small, but if a school or college's cohort is small, the CI will be wide.

A school or college level VA measure must always be considered alongside its confidence interval.

Schools or colleges where the lower limit of the CI is above 1000 represent schools and colleges where students on average made significantly more progress than students nationally, while schools and colleges where the upper limit of the CI is below 1000 represent schools and colleges where students made significantly less progress.

Examples for Key Stage 4 to 5 VA:

- a score of 995.3 with a CI between 983.1 and 1007.5 means the progress made by students in the school or college's Key Stage 5 cohort is not significantly different from the national average.
- a score of 1023.7 with a CI between 1015.3 and 1032.1 means the progress made by students in the school or college's Key Stage 5 cohort is significantly above the national average.
- a score of 987.6 with a CI between 977.9 and 997.3 means the progress made by students in the school or college's Key Stage 5 cohort is significantly below the national average.

Further information on calculation and interpretation of VA scores and confidence intervals can be found in the 'Key Stage 4 to 5 Guide to VA' document available on the www.education.gov.uk/performanceables website.

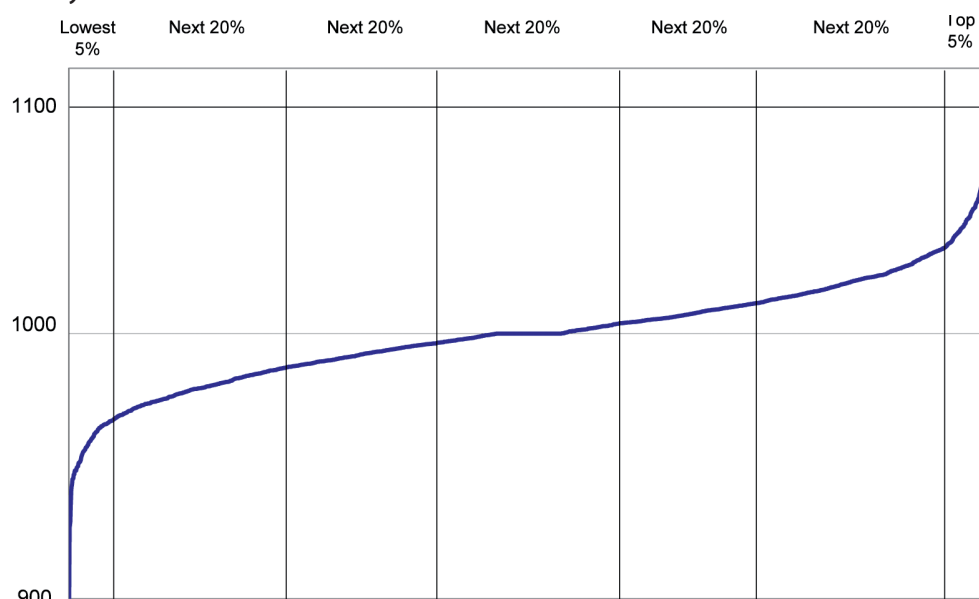

VA percentiles

The VA percentiles give the distribution of VA scores and show where institutions are placed nationally compared to other institutions, based on the VA score.

Key Stage 4-Key Stage 5 VA measure (centred around 1000)

Profile	Percentile
1031.7 and above	Top 5% of schools and colleges nationally
1011.4 - 1031.6	Next 20% of schools and colleges nationally
1003.9 - 1011.3	Next 15% of schools and colleges nationally
996.3 - 1003.8	Middle 20% of schools and colleges nationally
987.9 - 996.2	Next 15% of schools and colleges nationally
967.8 - 987.8	Next 20% of schools and colleges nationally
967.7 and below	Bottom 5% of schools and colleges nationally

Snake plots are a useful way of presenting percentiles. The following plot simply repeats the information shown above but in a way that enables the national distribution to be more easily understood.

Year on year comparisons

The tables also includes a time series showing how the average point scores per student and per examination entry, in each school and college, has changed since 2007. This allows you to compare the results for a school or college over the past four years.

What the year on year comparisons tell you

From the time series, you can see the history of a school or college's results, and whether they have stayed at the same level over time.

As each year group is made up of different students, with different prior attainment and other characteristics, results may fluctuate from year to year for reasons to do with the students rather than the school or college.

Small fluctuations from year to year are unlikely to be significant, particularly if the school or college's year group is small.

Students and Qualifications Reported

Students reported

The tables report the results of 16 to 18 year old students at the end of advanced level study in the 2009/10 academic year (otherwise referred to as end of 'Key Stage 5'). These students will have completed Key Stage 4 and studied level 3 qualifications before moving to higher education or employment by age 19. In the majority of cases this will be those students at the end of two years of advanced level study (akin to a traditional sixth-form), but may include those students completing in one year or three.

Qualifications reported

The performance indicators published in the Key Stage 5 Performance Tables are based on A level and equivalent level 3 qualifications only.

Level 3 qualifications are included in the tables on the basis of their equivalence with A levels. A qualification's 'equivalence' is quantified by looking at its size and the level of challenge it poses compared to an A level. The purpose of this is to report different types of qualifications on an equitable basis, rather than to make judgements about the value of particular qualifications, and to give schools and colleges full recognition for their students' level 3 achievement.

Results shown

The tables show the achievements of 16, 17 and 18 year olds at a school or college studying towards general and applied A levels, AS examinations and equivalent level 3 qualifications. The columns show:

- the number of 16, 17 and 18 year olds who, in 2009/10, were at the end of study towards general and applied A/AS or equivalent level 3 qualifications;
- the **average point score per student**; and
- the **average point score per examination entry**.
 - Both average point score calculations are based on the cumulative achievement of students, usually over two years.

■ The average point score per student provides a measure of the average number of A level equivalent studied and the grades achieved. The more qualifications undertaken by a student and the higher the grades achieved, the higher the average point score per student. However, the average point score per examination gives an indication of the average A level grade achieved by students at an institution. The higher the grade, the higher the points score per examination entry. Neither performance indicator should be considered in isolation.

The point score system

Since 2006, all level 3 qualifications approved under Section 96 of the Learning and Skills Act 2000 have been reported in the tables using the Qualification and Curriculum Development Agency (QCDA) point scoring system.

The National Qualifications Framework (NQF) and Qualifications & Credit Framework (QCF) set out the levels at which qualifications can be recognised. Only qualifications that have been accredited by the regulatory authority (Ofqual) are included in the NQF or QCF. Accredited level 3 qualifications are subsequently approved by the Secretary of State for use in schools and colleges. Qualifications approved for use include general, vocational and occupational categories.

QCDA have assigned each qualification a level 3 threshold contribution figure (expressed as a percentage) as well as a point score. Using this scoring system two A levels (and equivalent) contribute 100% to the level 3 threshold (i.e. one A level is equal to 50% of the level 3 threshold).

For the purpose of calculating the average point score per entry, each qualification is also assigned a "size" relative to an A level. Where an A level has a size of one, an AS and a BTEC National Diploma have a size of 0.5 and 3 respectively.

The following table lists a few of the common level 3 qualifications and their point scores based on the QCDA point score system as well as their size compared to an A level. Other approved qualifications at level 3 and their point scores can be found on Ofqual's new Register of Regulated Qualifications at:

<http://register.ofqual.gov.uk/>

The point scoring system developed by QCDA is designed for use as a means of measuring institutional performance in the tables. It is not intended that it should be compared to or replace national systems used for other purposes, such as the UCAS tariff used to decide student admission to higher education.

Grade	Size	Points	Grade	Size	Points	Grade	Size	Points

¹The grading structure and/or points for NVQ and BTEC qualifications vary depending on the qualification type – please use the Register of Regulated Qualifications website to find the performance figures for a specific type of qualification.

How the average point score per student is calculated

The **average point score per student** is calculated as the sum of the QCDA points awarded to each 16 to 18 year old student, divided by the total number of 16 to 18 year old students who are at the end of study towards general and applied A/AS or equivalent level 3 qualifications.

For example:

If student A achieves 2 general A levels at grade B, an applied A level at grade C and a general AS pass at grade D, they would score 780 points (240 + 240 + 210 + 90).

If student B achieves 1 applied Double Award at grade AB and an applied A level at grade B, and a Key Skill at level 3, they would score 813 points (510 + 240 + 63).

If student C attempts 1 general A level and receives a grade U but has passed the AS in the same subject with grade B, and achieves a distinction in a BTEC National Award, they would score 390 points (120 + 270).

Average point score per student

$$\frac{780 + 813 + 390}{3} = 661 \text{ points}$$

(The sum of each student's points)
(The total number of 16 to 18 year old students)

How the average point score per examination entry is calculated

The **average point score per examination entry** is calculated as the sum of the points awarded to each 16 to 18 year old student, divided by the total number of qualification entries. For this calculation, a general or applied A level and a BTEC National Award is each equal to one entry, a general/applied A level Double Award or BTEC National Certificate is equal to two entries, a general or applied AS level is equal to 0.5 of an entry, a Key Skill at level 3 is equal to 0.3 of an entry. The table above lists some of the common qualifications and the qualification entries counted.

Where a student has attempted an A level and failed, but they have been awarded an AS in the

same subject, the A level entry is still counted. So student C above would be treated as having 2 entries and not 1.5.

Using the above example:

Average point score per examination entry

$$\frac{780 + 813 + 390}{3.5 + 3.3 + 2} = 225.3 \text{ points (rounded to one decimal place using normal rounding conventions)}$$

(the sum of each student's points)
(the sum of each student's entries)

Local and national averages

A Local Authority average is also published for each of the 152 Local Authorities in England. These averages are based on the results of all further education sector colleges and state schools in the local area. These figures are shown at the top of the page.

There is also a national average figure for state funded institutions. This national average figure is based on state funded institutions (including CTCs and Academies) and further education sector colleges only. The second national average is based on the results of all schools (state funded and Independent) and further education sector colleges. You may wish to compare the results of individual schools and colleges with the published LA and national averages.

Special schools

Students who need more specialised teaching and facilities may go to special schools. Special schools with sixth-form students may choose to be included in the Key Stage 5 Performance Tables.

Sixth-form centres and consortia

In some areas, to pool resources and offer a wider range of post-16 courses to students, schools and colleges co-operate together in a group known as a sixth-form centre or consortium. Where schools and colleges are known to be part of a sixth-form centre or consortium, a symbol ♦ will appear in these tables next to the age range of the school or college. The centre or consortium will also be named and its results shown separately towards the end of the tables, together with the names of the participating schools and colleges.

More Information

About the tables

If you have any questions about the information contained in the tables, you should first contact the school or college concerned. If you have a more general query about the Tables themselves, then send your query to :

mailbox.performancedatateam@education.gsi.gov.uk

Printable versions of the primary, secondary school and Key Stage 5 Performance Tables are available at:

www.education.gov.uk/performancetables

All Other DfE publications are available on the Department's website:

www.education.gov.uk/publications

Local authorities, through their Connexions services, are responsible for providing careers guidance (and other support) to young people aged 13-19 and those with learning difficulties and disabilities up to age 25. You can also find more information about choosing courses and qualifications on the Connexions Direct and Directgov Young People websites at:

www.connexions-direct.com and
<http://www.direct.gov.uk/en/YoungPeople/index.htm>

Next Step, an integrated careers service for adults (aged 19+) can be accessed at:

<https://nextstep.direct.gov.uk/Pages/Home.aspx>.

Abbreviations and their Meanings

Type of institution

AC **Academies** are state funded schools that are independent of local authorities. Academies benefit from greater freedoms and flexibilities which help them to innovate and raise standards.

CTC **City Technology College or City College for the Technology of the Arts**, independent all-ability, non-fee paying school offering pupils the opportunity to study a curriculum geared, with the help of private sector sponsors, towards the world of work.

CY **Community school** maintained by the local authority (LA). The LA is the admission authority - it has main responsibility for deciding arrangements for admitting pupils.

CYS **Community special school**, maintained by the LA, which is specially organised to make special educational provision for pupils with special educational needs.

FD **Foundation school**, maintained by the LA. Some may have a foundation (generally religious) which appoints some - but not most - of the governing body. The governing body is the admission authority.

FDS **Foundation special school**, maintained by the LA, which is specially organised to make special educational provision for pupils with special educational needs.

MODFC **College funded by the Ministry of Defence.**

IND Registered **independent school**, normally charge fees.

IND(SS) **Independent school**, approved under the Education Act 1996 to take pupils who have statements of special educational needs.

NMSS **Non-maintained special school**, approved by the Secretary of State under the Education Act 1996, which is specially organised to make special educational provision for pupils with special educational needs.

VA **Voluntary aided school**, maintained by the LA, with a foundation (generally religious) that appoints most of the governing body. The governing body is the admission authority.

VC **Voluntary controlled school**, maintained by the LA, with a foundation (generally religious) that appoints some - but not most - of the governing body. The LA is the admissions authority.

Further education institutions are shown by their college type e.g. Agriculture and Horticulture College, Tertiary College etc. These categories further define the type of college.

Admissions Basis

COMP **Comprehensive** - takes all pupils, usually regardless of their ability, aptitude, or whether they have been selected for a place at a selective school, includes schools operating pupil banding admission arrangements.

MOD **Modern** - takes pupils regardless of their ability or aptitude and who have not been selected for a place at a local selective school.

N/A (not applicable) FE Sector college - takes students regardless of ability or aptitude.

NON SEL **Non-selective** - independent school which takes pupils usually regardless of their ability or aptitude.

SEL **Selective** - admits pupils wholly or mainly with reference to ability. These schools are formally designated as grammar schools.

NB: Some schools have dual admission arrangements which are partly selective and partly comprehensive. They are not separately identified in the tables.

Specialist School Types

(designated under the Specialist Schools programme)

NA Not a specialist school; or does not have a combined specialism; or does not have an additional specialism

A Arts

B&E Business & Enterprise

E Engineering

H Humanities

L Languages

M&C Mathematics & Computing

Mu Music

Sc Science

Sp Sports

T Technology

SEN Special Educational Needs (SEN) and Inclusion (special schools can choose to specialise in one of the four areas of the SEN code of practice)

SEN C&I SEN Specialism Communication and Interaction

SEN C&L SEN Specialism Cognition and Learning

SEN BES SEN Specialism Behaviour, emotional and social difficulties

SEN S&P SEN Specialism Sensory and/or Physical Needs

AL Applied Learning (only available in combination with one of the other specialisms)

In addition to the specialist school types listed above, following a successful re-designation specialist schools, if they met a range of criteria, were invited to take on an additional specialism and become part of the High Performing Specialist Schools (HPSS) Programme. The options included second curriculum specialisms of the types listed above or specialisms in system leadership as follows:

LEPP Leading Edge Partnership Programme

RAP Raising Achievement Partnership Programme

TS Training School

LPS Leadership Partner School

Also note that schools may have more than two specialisms (e.g. main specialism, second curriculum specialism, system leadership specialism). From September 2009 Training Schools have been disaggregated from the HPSS programme but Training School is listed as an additional specialism as most schools will have become training schools through the HPSS route.

Specialist School status does not apply to independent schools.

The HPSS programme ceases from April 2011.

Other Abbreviations

LA Local authority

GCSE General certificate of secondary education

AS Advanced Subsidiary - a qualification available in general and applied subjects

NQF level 3 National Qualifications Framework level 3 qualification

BTEC Business and Technology Education Council

R The school or college has not confirmed that it has checked the examination results

♦ Member of sixth-form centre/consortium

N/A Historical data not available

④ also appears in the secondary GCSE (and equivalent) performance tables

② This school has pupils eligible for Key Stage 2 assessment. Relevant results are in the Key Stage 2 Tables.

Value added measure has been suppressed because coverage is less than 50%

< Data suppressed as the school or college has 10 or fewer students in a particular denominator for the indicator. Results are not shown because of the risk of an individual student's results being identified.

- School or college has 16-18 year old students but no examination entries

<blank> School or college has no 16-18 year old students
